

Wacom Intuos Tablet: Getting Started

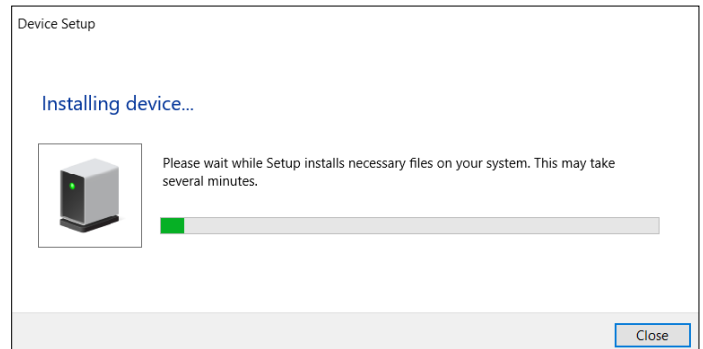

1 Make sure you are connected to the internet and close out of all programs you are currently in before plugging in the tablet.

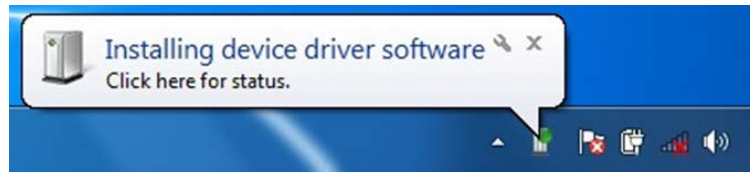

2 Plug the tablet into a USB port using the cable provided in the box.

3 The device drivers will begin to install on your device and a notification will appear (see pictures at right for examples). Be patient, as this might take a few minutes.

OR

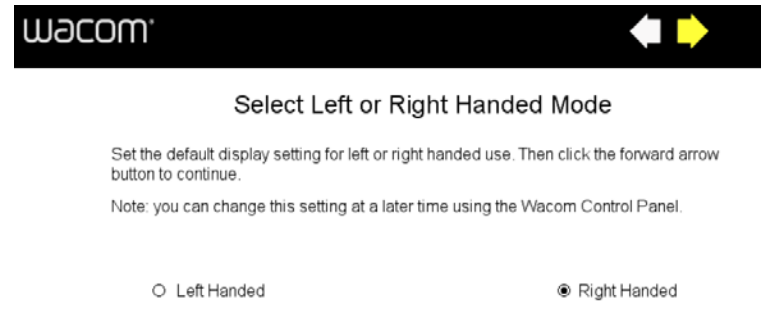

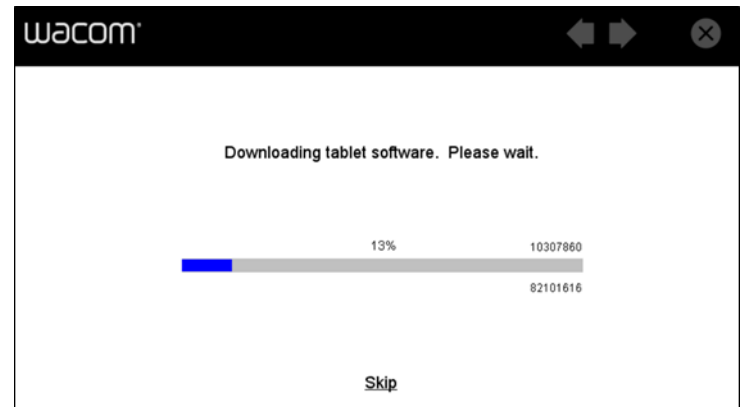

4 When the drivers have finished installing, a menu will appear. Click **Install Tablet**.

5 Choose **Left or Right Handed Mode** by selecting either Left Hand or Right Hand. This can be changed later if needed. Click the right arrow at the top to proceed to the next step.

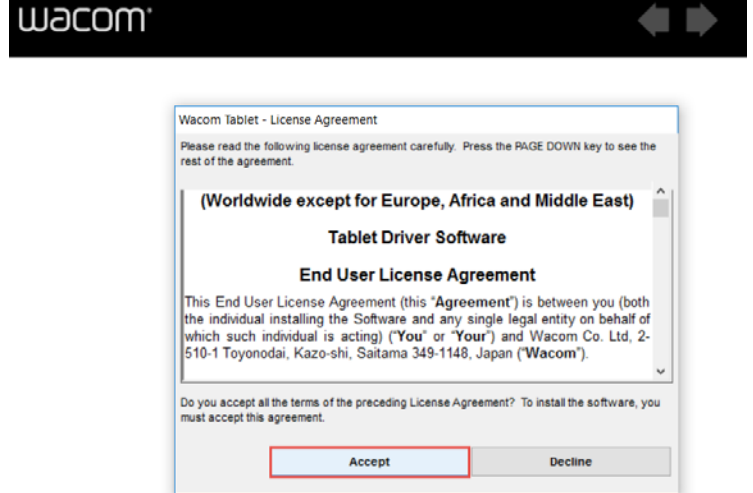

6 The program will now download and install.

7 Click **Accept** when the License Agreement appears.

8 When the Wacom website opens in your browser, close it.

9 You will receive a message that says **Driver installation completed**. Click the right arrow to continue.

10 Close out of the window by pressing the **x** in the top right corner.

Restart your computer.

11 Place the tablet in front of you so that the black diagonal buttons are at the top. Begin using your tablet.

For more information on using your tablet, click [here](#).
